

HR Workforce Insights & Employee Attrition Dashboard

Objective

To design a Power BI dashboard that provides insights into workforce demographics, employee performance, and attrition trends while supporting data-driven HR decisions.

Tools Used

- 1 Power BI
- 2 Microsoft Excel
- 3 DAX
- 4 Power Query

Dataset Description

The dataset contains 100 employee records including demographics, salary, performance, and attrition status. It includes fields such as Employee ID, Department, Job Role, Monthly Income, Satisfaction Scores, and Attrition Risk Level.

Dashboard Features

- 1 KPI Cards (Total Employees, Attrition Rate, Average Income)
- 2 Attrition Analysis by Department and Job Role
- 3 Employee Risk Segmentation
- 4 Interactive Filters and Slicers
- 5 Trend Analysis over Time

Key Insights

- 1 Higher attrition observed in Sales and HR departments
- 2 Overtime and low satisfaction strongly linked to attrition
- 3 High-risk employees identified using risk segmentation
- 4 Work-life balance impacts retention significantly

Conclusion

This project demonstrates how HR analytics can help organizations reduce attrition, improve employee satisfaction, and support workforce planning through data-driven insights.
